

ETRALI RECORDING – COMPACT EDITION

ETRALI TRADING SOLUTIONS

Orange Business Services is a leading provider of unified communications solutions dedicated to the trading community. The Trading Solutions of Orange Business Services are used in more than 1,600 trading rooms in more than 80 countries. The Etrali Voice Platform provides traders with an efficient voice trading system and seamless integration into the customer's environment.

SPECIAL COMPACT EDITION

For Etradeal Compact, CyberTech has developed a special Compact Edition of its Recording Solution. Benefits of this single box recording solution are:

- **Turn-key solution** for recording of the Etrali Trading Solutions: everything is in one box.
- Recording for up to **60 channels**: recording available in configurations for 8, 16, 24, 30 or 60 channels.
- Easy, completely **browser-based** user interface: No additional workstation software required.
- Standard **security** features such as encryption, audit trails, user management and secure connections.
- **Low costs for maintenance** because commercial-off-the-shelf hardware equipment is used.

The Recording Solution is connected to the Etrali Voice Platform via one or more PCM30 connections. By using the CDR port of Etrali, additional call information is added to each recorded call.

HARDWARE

The Compact Edition of the CyberTech Recording Solution is installed on a HP Proliant DL360 server. This 1U industrial sever is equipped with 2 x 72GB Hard Disks in a RAID1 configuration for local on-line storage, and one DVD-RAM drive for long-term archiving. The dual hot-swappable Power Supply and multiple fans complete this highly robust and resilient hardware platform.

SOFTWARE

The CyberTech Recording Solutions comes with a complete set of installed software for an unlimited number of users, and with all features standard included. An intuitive, browser-based, search and replay application enables recordings to be securely retrieved and replayed from any location via LAN or WAN. No software needs to be installed on the Workstations, a web-browser is sufficient.

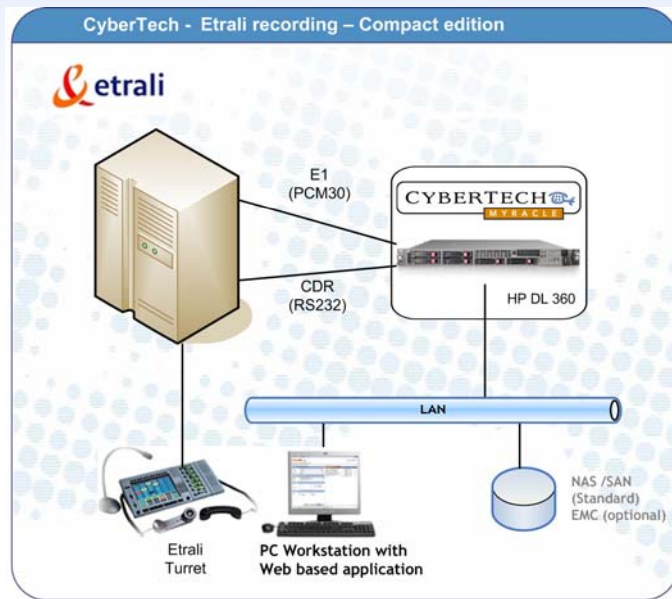

ARCHITECTURE

The requirements on Etrali for using the Compact Edition of the CyberTech Recording Solution are:

- Etrali software version 33 or newer,
- SIM 709 card - connected to the SIM 622 box,
- SIM 622 box - providing the serial connection.

The Recording Solution is connected to the Etrali Voice Platform via one PCM30 connections. By using the CDR port of Etrali, additional call information is added to each recorded call.

CYBERTECH RECORDING SOLUTIONS

CyberTech Recording Solutions are the first open and secure recording solutions designed to use industry standard hardware and software. This advanced technology is being used by the world's leading financial institutions, governmental and public safety organisations and contact centres. By taking advantage of commercial off-the-shelf hardware and customer provided network storage devices, this future-proofed solution for the capture, storage, retrieval and playback of voice, radio and data communications provides unsurpassed functionality while reducing a firm's total cost of ownership. This flexible, multi-media product delivers high quality recordings of traditional or VoIP telephony, data and workstation screens for all applications including verification and compliance, dispute resolution, training and quality monitoring.
